THE DRUM&BASS INTERFACE

Welcome!

"A very warm welcome to one of the World's first Apple Loops CDs! This title is already well established as a firm favourite with professional musicians but will hopefully be a welcome addition to a much wider audience now it's arrived in this format. Being one of the first ever Apple Loops CDs, Soundtrack was literally only released last week, makes it difficult to know exactly what people are going to need from this library. The loop content was obviously essential but we also decided to include a number of single hit samples too as we believe that they might be useful within Soundtrack to make custom 'tweaks' and also in other software you might use to complement your mix or create custom loops of your own. Hopefully we've made the right decisions already but we're very excited about this format and already have plans for further releases in the near future. We'll constantly tailor these to try and ensure we can offer you 'made-to-measure' samples at 'off the peg' prices!" - Matt 8), Founder, AMG

Apple Loops

The new Apple Loops format offers richer information than standard audio files, so you can quickly find a loop by instrument, genre or mood. You can then instantly set the tempo and key of your choice. Mixing and matching loops and effects gives you endless combinations. Arranging your piece is as easy as drag and drop using loops as your building blocks. The combination of Apple's software and Apple Loops ensure professional results are a breeze for the pro and novice alike.

Compatibility Notes

Apple Loops are created primarily for Apple's GarageBand & Soundtrack Software and are compatible with any version of these as well as any other future software releases that can also read Apple Loops - like Emagic's Logic. Additionally Apple Loops can also be treated simply as Aiff files and be loaded into any software on any platform that supports this basic file format. However the additional features of Apple Loops will not be available. Requires Mac OS 8.1 or later; built for Mac OSX.

Thanks

AMG would like to thank all the guys at Apple for their help. In particular Bill Havlicek, Alec Little, Craig Linssen and Mark Altekruze. In addition I'd like to thank our friends at Emagic in particular Carsten Dierksen, Bob Hunt, Clint Ward and Dot Bustelo. We'd also like to thank Sebastien Monneret, Kenny Hemphill, Jonathan Wilson and of course all the people involved with putting together our titles.

All your favourites are included:

Specially Programmed Drum Breaks - Upright Bass Licks & Deep Bass Sounds

Gated, Musical and Bizarre FX - Live Drum Breaks - Rhodes Licks

Ambient Atmospheres - Sax Licks - Synth Pads, Noizs, FX & MUCH MORE!

"...a bunch of real stormers in here. The loops are sharp, punchy, tight, hard and perfect for the genre. Exceptionally well recorded these powerful loops will punch through a mix...there is hardly a weak link in this collection...Don't be surprised if the the next CD you listen to sounds rather tame by comparison...If you're thinking of making Drum and Bass music then make this your first sample CD purchase...there is a lot of usable material here that you will want to make use of...this is a CD you will keep returning to...Overall - Essential purchase for Drum and Bass makers - 9/10." - SOUNDDUSER Review

"I could blather about how great this library is, but second listener Greg Rule sums it up best: 'From the evocative pads and wicked synth basses to the expressive instrumental riffs and edgy loops, there are loads of club-ready components for launching a track. I defy any electronic music lover to give this library a test drive and not walk away buzzed.'"

IMPORTANT - LICENCE INFORMATION

By purchasing this CD and breaking its seal you are entering into a single user licence agreement with its producers. The purchaser is then entitled to utilise the sound samples featured in the production of their AV-synchronised musical compositions providing the sample users are notified to AMG via mail, e-mail, fax (UK +1252 695680) or internet (www.amguk.co.uk) prior to release and a copy of the project submitted to AMG after completion for our records. This version of this library is ONLY licensed for use in AV and not in unsynchronised music. Alternative versions are available which are licensed for this use, visit www.samples4.com for full details. Providing these conditions are adhered to no licence fees will ever be payable. However failure to adhere to these conditions on any commercial project without the prior agreement of AMG will represent a breach of our licence agreement and treated as such. These conditions are designed to protect not only our interests but also those of the legitimate purchaser of our products. This system allows us to monitor the use of our samples and ensure that all commercial users at least are legitimate licensees. To avoid any potential problems for yourself and those you work with, please ensure you always use official products which you're licensed to use. All rights of the producer and owner of this work reserved. Unauthorised reselling, copying, hiring, recycling, renting, public performance and broadcasting of this CD, its name or artwork by any means is prohibited. Purchase of this CD entitles the purchaser to use the audio material featured in their AV-synchronised music only, not for the creation of any competitive product. Any infringement of copyright will be pursued to the fullest extent of the law. The producers cannot take responsibility for any direct or consequential loss that may occur when using this product. If you do not wish to accept these terms please return this CD, with its seal intact, to your supplier for a refund or exchange. By breaking the seal on this CD you are agreeing to abide by the terms of our licence.
